

CONNECTIVITY ON BISHOP BRADY'S WIRELESS NETWORK

Bishop Brady provides wireless connectivity as a student service.

- Students may bring their own mobile electronic device to school. **Only one device per student will be permitted on the network for school use.**
- Content Filtering software and Network security programs along with a Fiber Optic connection have been installed to make the BBHS network fast, secure and reliable.
- All students must register on the school's networked computers first, before registering any device.
- **An anti-virus program must first be installed on ALL laptops, including Apple computers..**
- Bishop Brady users will be prompted to accept terms of use prior to connecting to the BBHS public network.
- Your electronic device will be scanned for updated software.
- Because of licensing limitations, only one device can be registered. If you decide to change a device, please see Mrs. Walsh in the Business Office.

Some points to keep in mind:

- Use of the BBHS wireless network is entirely at the risk of the user
- BBHS is not responsible for any loss of information that may arise from the use of the wireless connection, or for any loss, injury, or damages resulting from the use of the wireless connection
- All users of the BBHS wireless network are bound by the School Policy on Technology Use: Personal Electronic Devices (Use in the School), Responsibility for Personal Electronic Devices, Internet Acceptable Use and Guidelines on Social Media

Students who do not accept the terms of service will not be able to access the BBHS wireless network. Once on the BBHS Public network, all users will have filtered Internet access just as they would on an internally connected, BBHS-owned device.

The mobile electronic device a student brings to school is the sole responsibility of the student. Bishop Brady assumes no liability and accepts no responsibility for a student's mobile electronic device if it is lost, loaned, damaged or stolen. Only limited resources will be spent to locate lost or stolen items.***

- Bishop Brady staff are not responsible for configuring personal devices to access the network
- BYOD participants are prohibited from sharing personal devices, creating "hot spots," and deliberately tampering with school system property or property of others.
- Users should strive to maintain appropriate bandwidth for school-related work and communications
- Students will charge their device each night and take the necessary precautions to "save" battery power during the day

Students are required to adhere to the School Policy on Technology Use as described in the Student/ Parent Handbook for Personal Electronic Devices, Internet Acceptable Use and Guidelines on Social Media.

***All Apple devices should take advantage of the free "Find My iPhone" app (including laptops and tablets). When activated, all Apple devices can be locked remotely if lost or stolen, and located if the device connects to the Internet or cell service.

*** Some PC Antivirus programs also have anti theft. Absolute/lojack can be purchased for a monthly fee.

Bishop Brady embraces the use of educational technology as a means of fulfilling our vision of a Brady Graduate at Graduation to be "engaged in learning" and to explore new ways of gaining knowledge for lives of faith, learning and service.
